LIFETIME BONUS
UP TO **35%**

SNAPSHOT OF CONDITIONS

- LifeTime bonus is characterized by 3 to 5 Tiers of the bonus amount.
- LifeTime Deposit Bonus is available until client completely utilizes all available bonus amounts from all the Tiers.
- The Bonuses claimed will expire in the trading account on the date shown in the section "Bonus Validity" of LifeTime deposit bonus tab in the Client's Member Area.

The screenshot displays the 'LifeTime Bonus' interface. At the top, there is a green 'Available' badge. Below it, the title 'LifeTime Bonus' is shown. A 'Claim Period' box indicates the dates '17.08.2021 - 17.08.2030'. A progress bar shows the 'Bonus Amount' with markers at \$0, \$500, \$1000, \$3000, and \$5000, and 'Bonus Percentage' markers at 35%, 20%, 15%, and 10%. The 'Bonus Validity' is 'Till 16.09.2021'. An 'Extra Bonus' box shows '>50% tier / +25%'. Under 'Supported Accounts', it says 'STANDARD'. There is a 'Terms and Conditions' section with a PDF icon and the text 'Terms & Conditions'. At the bottom, there is a large green 'CLAIM BONUS' button.

Figure A

CLAIM PERIOD

The claim period of bonus.

PROGRESS BAR

After a deposit operation is successfully completed and the corresponding bonus credits are provided, it will be reflected in the progress bar within your Member Area.

EXTRA BONUS

>50% Tier refers to the percentage of the Tier that should be utilized in one deposit operation to receive an extra bonus.

+25% indicates the percentage of the Basic Bonus that will be additionally provided as Credit to the trading account.

SUPPORTED ACCOUNT

Ensure that the account type is supported. If not, kindly create one before claiming this bonus.

Client can choose to utilize this bonus simultaneously, over several trading accounts.

Client can determine the size of the bonus amount to utilize, at his/her own time.

Extra Bonus – additional bonus, which is provided if the client utilized more than the certain percentage of the Tier in one deposit operation.

Extra Bonus parameters are indicated with the LifeTime Deposit Bonus description in MA.

This shows the main bonus, which is provided based on the percentage bonus Tiers.

Bonus percentage offered is dependent on the tier from which bonus credits are utilized.

- 1st parameter: (e.g. >50%) – shows percentage of the Tier that should be utilized in one deposit operation to receive an extra bonus.

- 2nd parameter: (e.g. 25%) – shows percentage of the Basic Bonus that will be additionally provided as Credit to the trading account.

i DEPOSIT AMOUNT
Amount will be converted into base currency and bonus amount will also be reflected below

ii BONUS TIERS
The Bonus amount is dependent on the percentage of current Tier and Deposit Amount. The Bonus amount is currently in Tier 1 (\$0-500), bonus percentage is 35%.

The example shown above shows the following:

- i. When client clicks to make a deposit operation – client will see the details how the bonus is calculated based on tiers (ii).
- ii. The deposited amount entitles client for a Basic Bonus of 87.50USD. However, there is no Extra Bonus, so it will indicate 0USD.

Bonus Redeemed on 13.08.2021

The maximum size of the LifeTime deposit bonus depends on the total sum of deposit bonus Tiers.

Bonus amounts can be split between several trading accounts, but bonus amounts can not be multiply used on the same trading account. Size of the basic bonus which is provided into the trading account is calculated as deposit amount multiplied by the percentage of the currently active Bonus Tier.

For example there are three Bonus Tiers with the following percentages per Tier:

BONUS TIER RANGE (FROM - TO)		BONUS PERCENTAGE
\$0	\$99.99	50%
\$100	\$299.99	30%
\$300	\$400	10%

- 1) When client deposits \$2,000 -
For the first \$100 (Tier 1) of Bonus amount - the percentage will be **50%**, it will utilize **\$200 (\$100 / 50%) of the deposit amount.**
- 2) \$1,800 of deposit remains unallocated and subsequent Tiers will be utilized.
For the next 200\$ (Tier 2) of Bonus amount - percentage will be **30%**, it will utilize **\$666.67 (\$200 / 30%) of the deposit amount.**
- 3) \$1,133.33 of deposit remains still unallocated.
For the next 100\$ (Tier 3) of Bonus amount - percentage will be **10%**, it will occupy **\$1,000 (\$100/ 10%) of the deposit amount.**
- 4) Remaining amount of \$133.33 won't generate any Bonus, as the Bonus has been already utilized in full.
The total amount of the provided Bonus on \$2,000 deposit is \$100 + \$200 + \$100 = \$400.

Extra bonus parameters are indicated under the LifeTime deposit bonus description in MA.

First parameter (for example: >50% Tier) [Refer to Figure A] indicates the percentage of the Tier that should be utilized in one deposit operation to receive an extra bonus.

Second parameter (for example +25%) [Refer to Figure A] indicates the percentage of the Basic Bonus that will be additionally provided as Credit to the trading account. Extra Bonus is deducted from the bonus credit available in the current or next Bonus Tier.

For example there are three Bonus Tiers with the following percentages per Tier and Extra bonus parameter is: ">50% Tier / +25%" - it should be interpreted as if more than 50% of the bonus Tier is utilized - extra half of the Basic bonus will be provided:

BONUS TIER RANGE (FROM - TO)		BONUS PERCENTAGE
\$0	\$99.99	50%
\$100	\$299.99	30%
\$300	\$400	10%

1) When client deposits \$500 -

For the first 100\$ (Tier 1) of Bonus amount - percentage will be 50%, it will utilize \$200 of the deposit amount. More than 50% of the Tier was utilized (in fact 100% of the first Tier). Extra bonus will be \$50.

2) \$300 of deposit remains unallocated and subsequent Tiers will be utilized.

Also 50\$ of Bonus from 200\$ is utilized, so the remaining bonus on Tier 2 is \$150. Percentage will be 30%, it may utilize up to \$500 of the deposit amount, however the amount for distribution is only \$300.

\$300 at 30% bonus percentage is \$90, which is less than 50% of the Tier.

It means that from Tier 2 there will be no Extra bonus.

The total amount of the provided Bonus on \$500 deposit considering enabled Extra Bonus is

\$100 + \$50 + \$90 = \$240.

Bonus will be deducted, when client makes a withdrawal or his account gets stopped out.

- Client is allowed to make a withdrawal or internal transfer which will proportionally decrease the size of the provided bonus amount.
- Any withdrawal or internal transfer operation after the deposit bonus was applied will affect the credit, until the credit is 0.
- Apart from new deposit , this also includes previously deposited funds.

The percentage by which bonus amount will be decreased is calculated as the following:

$$\text{(Current withdrawal or internal transfer) / (Initial Deposit)}$$

** All further withdrawals (internal transfers) are linked to the deposit when credit was provided.*

Example: It means, that if the client deposited \$1,000, received \$280 as a bonus and later on when his Balance was \$800 he requested withdrawal of \$400 - his balance would be decreased by 40% (400/1,000), bonus in absolute value will be decreased by \$112 (\$280*40%). The withdrawal (or internal transfer) operations are decreasing bonus in the mentioned percentages until the client completely withdraws the initial deposit.

In the table below you can find trading and deposit/withdrawal operations on the account which shows how Bonus changes. Each date stands for one type of operation.

DATE	DEPOSITED MONEY	TRADING ACTIVITY	BALANCE OF ACCOUNT	BONUS (CREDIT)	WITHDRAWALS / DEPOSIT	WITHDRAWAL % OF DEPOSITS	CHANGE OF BONUS AMOUNT	EQUITY WITH BONUS
15.04	\$1,000		\$1,000	\$280				\$1,280
16.04		+\$200	\$1,200	\$280				\$1,480
17.04			\$800	\$168	-\$400	-40%	-\$112	\$968
18.04		-\$100	\$700	\$168				\$868
19.04			\$1,200	\$168	\$500			\$1,368
20.04			\$1,200	\$168				\$1,368
21.04			\$700	\$28	-\$500	-50%	-\$140	\$728
22.04		+\$600	\$1,300	\$28				\$1,328
23.04			\$1,200	\$0	-\$100	-10%	-\$28	\$1,200
24.04			\$1,050	\$0	-\$150			\$1,050

Rebates are calculated based on traded lots of real deposits.

Traded volume generated from the trading activity on the account where a single deposit bonus was provided is decreased proportionally to the percentage of the Credit size on the account to Balance size of the account at the moment of rebates calculation.

Traded volume for rebates calculations is calculated by the formula:

$$\text{Traded Volume} * (1 - (\text{Credit} / (\text{Balance} + \text{Credit})))$$

When Balance equals to zero after the negative balance protection - Rebates are provided in full (Traded Volume * 1) once to process rebates for trades being closed in the last rebate cycle.

Example: Let's assume client's Balance traded 1 lot and at the moment of rebate calculations (each 2 hours) his Credit was \$280 and Balance of the account \$1,000, it means that the traded volume which will be used for rebates calculation is 0.78 lots ($1 * (1 - (280 / (1,000 + 280)))$). Each time before rebate calculations the latest Balance and Credit values of the account will be used.

Please refer to the following table, which shows different scenarios of the rebates calculations. The size of Balance, Credit and Floating are taken at the moment of rebate calculation.

BALANCE	CREDIT	FLOATING	EQUITY	TRADED VOLUME (CLOSED IN THE REBATE CYCLE)	VOLUME FOR REBATES CALCULATIONS
\$1,000	\$280	\$0	\$1,280	1	0.78
\$50	\$280	\$0	\$330	1	0.09
\$1,000	\$280	-\$90	\$1,190	1	0.78
\$1,000	\$280	\$90	\$1,370	1	0.78
\$1,000	\$280	-\$250	\$1,030	1	0.78
\$1,000	\$280	-\$40	\$1,240	1	0.78
\$3,000	\$280	\$0	\$3,280	1	0.91
\$10,000	\$280	\$0	\$10,280	1	0.97
\$0	\$0	\$0	\$0	1 (negative balance protection was applied to the account)	1 (only applied once for processing last rebate cycle trades)

GENERAL TERMS OF THE LIFETIME DEPOSIT BONUS

1. LifeTime deposit bonus is a special credit which is provided to a client's trading account (account type is indicated in the Bonus Campaign offer) when the client makes a deposit to his trading account. It means that all the specifications and characteristics (spreads, leverage, stopout/margin call level, margin requirements, commissions and etc) of corresponding accounts are applied.

2. LifeTime deposit bonus is a special type of bonus which is not related to any promotion campaign and available until the client completely utilizes all available bonus amounts from all the Tiers.

3. LifeTime deposit bonus is characterized by 3-5 Tiers of the bonus amount. When the Bonus amount (Credit) from one Tier is used - the next available Tier will be utilized.

4. Bonus percentage depends on the Tier from which bonus credits are utilized. If the calculated bonus amount is more than the size of the first and subsequent Tiers - deposit amount will be automatically split into parts to utilize each Tier in full one by one. Bonus percentage will be applied according to each particular Tier, as it is indicated in the MA progress bar.

5. Progress bar of the LifeTime deposit bonus represents: the Bonus Tier range on the top and Bonus percentages at the bottom. Progress bar is filled with color according to the utilization of the LifeTime deposit bonus credit. Progress bar shows in which Tier (from blue to gray dot) the client is located now.

6. The maximum size of the LifeTime deposit bonus depends on the total sum of deposit bonus Tiers. Bonus amounts can be split between several trading accounts, but bonus amounts can not be multiply used on the same trading account. Size of the basic bonus which is provided into the trading account is calculated as deposit amount multiplied by the percentage of the currently active Bonus Tier.

1) Client deposits \$2,000. For the first 100\$ (Tier 1) of Bonus amount - percentage will be 50%, it will utilize \$200 ($\$100 / 50\%$) of the deposit amount;

2) \$1,800 of deposit remains unallocated and subsequent Tiers will be utilized.

For the next \$200 (Tier 2) of Bonus amount - percentage will be 30%, it will utilize \$66.67 ($\$200 / 30\%$) of the deposit amount.

3) \$1,133.33 of deposit remains still unallocated. For the next \$100 (Tier 3) of Bonus amount - percentage will be 10%, it will occupy \$1,000 ($\$100/10\%$) of the

deposit amount.

4) Remaining amount of 133.33 won't generate any Bonus, as the Bonus has been already utilized in full.

7. Depending on the Extra bonus settings indicated in the MA - Extra bonus may be provided together with Basic bonus. Basic Bonus - main bonus, which is provided based on the percentage bonus Tiers. Extra bonus - additional bonus, which is provided if the client utilized more than the certain percentage of the Tier in one deposit operation.

8. Extra bonus parameters are indicated under the LifeTime deposit bonus description in MA. First parameter (for example: >50% Tier) indicates percentage of the Tier that should be utilized in one deposit operation to receive an extra bonus. Second parameter (for example +50%) indicates the percentage of the Basic Bonus that will be additionally provided as Credit to the trading account. Extra Bonus is deducted from the bonus credit available in the current or next Bonus Tier. For example there are three Bonus Tiers with the following percentages per Tier and Extra bonus parameter is: ">50% Tier / +50%" - it should be interpreted as if more than 50% of the bonus Tier is utilized - extra half of the Basic bonus will be provided:

1) Client deposits \$500. For the first \$100 (Tier 1) of Bonus amount - percentage will be 50%, it will utilize 200\$ of the deposit amount. More than 50% of the Tier was utilized (in fact 100% of the first Tier). Extra bonus will be \$50.

2) 300\$ of deposit remains unallocated and subsequent Tiers will be utilized. Also 50\$ of Bonus from \$200 is utilized, so the remaining bonus on Tier 2 is 150\$. Percentage will be 30%, it may utilize up to \$500 of the deposit amount,

however the amount for distribution is only \$300. \$300 at 30% bonus. percentage is \$90, which is less than 50% of the Tier. It means that from Tier 2 there will be no Extra bonus.

The total amount of the provided Bonus on \$500 deposit considering enabled Extra Bonus is $\$100 + \$50 + \$90 = \240 .

9. Leverage of the LifeTime deposit bonus account is changed according to the size of the Equity on the account. Equity is calculated as a sum of Balance and Credit (provided bonus). Equity levels according to which Leverage is changed can be found on the website under Trading Conditions: <https://www.aximtrade.com/trading-conditions>. For specific campaigns fixed leverage can be applied, what will be stated in the campaign offer. Client needs to confirm his participation in the bonus campaign where the leverage will be fixed until the bonus is revoked from the account.

10. LifeTime deposit bonus can be provided to a client's accounts multiple times until bonus is utilized in full. It means that client can request and receive several deposit bonuses on different or the same account within one LifeTime deposit bonus campaign.

11. The bonuses provided under the LifeTime deposit bonus campaign are limited in time and will expire on the date shown in the section "Bonus Validity" of LifeTime deposit bonus tab in the Client's Member area. Upon reaching the ending time - bonus will be cancelled next day at 01:30 Server time. Clients must take control of their margin required to maintain open positions in order to avoid stopout after credit deduction. However, clients can utilize the next available bonus amount from the tier with next deposit operation, if there is any bonus amount left.

12. LifeTime deposit bonus is provided to the account in a form of Credit operation and stays on the account under the Credit amount. It can be used only for Margin support on the account. LifeTime deposit bonus can't be withdrawn partially or in full. Bonus will be revoked if the Balance of the trading account drops to or below \$0.01. Negative floating (result of open trades) of the account uses full Credit support, meaning Equity available for margin is calculated as: $\text{Balance} + \text{Credit} + \text{Floating}$.

13. Bonus is provided to the trading account automatically along with the deposit operation. Bonus can't be provided without a deposit operation, meaning that any form of transfers between accounts (internal transfers), refunds to the account or any other operation can't be a subject for bonus allocation. Bonus is provided only in case of deposit operations through the payment channels listed in the Member Area on a deposit page.

14. Clients are allowed to make further deposits to the same account and qualify for LifeTime bonus. In that case additional bonus will be provided on top of the already provided Lifetime bonus. Previously provided bonus won't be replaced by a new one.

15. LifeTime deposit bonus can be provided to any trading account of the same client, but if the client already has a bonus on the account from the different type of campaign - previously provided bonus will be revoked. However client can accumulate on one account several lifetime bonuses. It means that client can make one deposit operation, receive bonus and when client makes subsequent deposit operations within LifeTime bonus campaign - Credit on the trading account will be accumulated.

16. Client is allowed to make a withdrawal (or internal transfer) of his funds from the trading account, but such operation will proportionally decrease the size of the provided bonus amount, regardless the client withdraws (transfers) previously deposited funds or part of a new deposit, when credit was provided. Any withdrawal (or internal transfer) operation after the deposit bonus was applied will affect the credit, until the credit is 0. The percentage by which bonus amount will be decreased is calculated as $(\text{Current withdrawal or internal transfer}) / (\text{Initial deposit})$. All further withdrawals (internal transfers) are linked to the deposit when credit was provided. If a client made multiple deposit operations and several bonuses were accumulated on the account - bonuses will be deducted one by one starting from the first operation, until all withdrawal is completed.

* It means, that if the client deposited \$1,000, received \$280 as a bonus and later on when his Balance was \$800 he requested withdrawal of \$400 - his balance would be decreased by 40% ($400/1,000$), bonus in absolute value will be decreased by \$112 ($280*40\%$). The withdrawal (or internal transfer) operations are decreasing bonus in the mentioned percentages until the client completely withdraws the initial deposit.

17. Traded volume generated from the trading activity on the account where a LifeTime deposit bonus was provided is decreased proportionally to the percentage of the Credit size on the account to Balance size of the account at the moment of rebates calculation. Traded volume for rebates calculations is calculated by the formula: $\text{Traded Volume} * (1 - (\text{Credit} / (\text{Balance} + \text{Credit})))$. When Balance equals to zero after the negative balance protection - Rebates are provided in full ($\text{Traded Volume} * 1$) only one time to process rebates for trades being closed in the last rebate cycle.

18. AximTrade preserves the right to revoke LifeTime deposit bonus and cancel the trading result of all trades or part of them, generated rebates if the client is accessing other clients LifeTime deposit bonus accounts or simply other trading accounts from the same device or IP address and/or makes any form of abusive trading, like Internal hedging, latency arbitrage, rebates generation which can be characterized as trading without any trading intention, or any other trading activity which can be treated by AximTrade as abusive trading.

19. Clients are not allowed to provide access to the trading account through trading password to any other user. In case of the violation of this condition AximTrade preserves the right to revoke LifeTime deposit bonus and cancel all the trading result of all trades and generated rebates.

20. Clients who are sharing the same bank account for deposit/withdrawal operation or are doing any other form of activity where there is only one final beneficiary of the trading results and/or rebates - will be disqualified from the LifeTime deposit bonus and their bonus will be revoked, trading results and rebates will be cancelled.

21. Clients are not allowed to perform any kind of trading, which can be qualified as scalping. AximTrade defines scalping as a trading strategy whereby profits are returned by taking advantage of internet latencies, delayed prices caused by technical issues or other conditions, or where both buy and sell orders are entered at, or nearly at the same time (minimum of 30 seconds is required per opened order). Scalping is considered a serious breach of our Terms and Conditions, and as such, AximTrade may in its absolute discretion close out, replace, reverse any Transactions or close out the Account with immediate effect. Any indication or suspicion, in AximTrade's sole discretion, of any form of arbitrage (including but not limited to risk free profiting), abuse (including but not limited to participant's trading activity patterns that indicate that the participant solely aims to benefit financially without being genuinely interested in trading in the markets and/or taking market risk; or trading activity where majority of trades are reopened in the same trading instrument less than 30 seconds after the trade in the same direction was closed), keeping account completely hedged more, than 50% of the trading time, internal hedging in coordination with other parties or any other form of hedging with the attempt to abusive trading intentions, abuse of our 'negative balance protection', fraud, manipulation, cash-back arbitrage or any other forms of deceitful or fraudulent activity, will constitute all Transactions carried and/or profits or losses garnered as invalid. In these circumstances, we reserve the right to close/suspend (either temporarily or permanently) all of the Client's trading Accounts and/or cancel all trades. In view of the above, please note that you will be strictly prohibited from opening any new trading Account(s) and trade with AximTrade.

22. AximTrade preserves the right to revoke bonus and cancel all trades and rebates if the client is making any type of risk free profiting based exclusively on the utilization of bonus funds which can arise from any technical issue on AximTrade system.

23. AximTrade does not guarantee that the placement of a Stop Loss will fully protect against excessive losses being incurred on your account. Stop Losses are intended to reduce risk. You should maintain adequate levels of free margin in your account to maintain open positions at all times.

24. Accounts where a LifeTime deposit bonus was applied are staying under the basic Terms and Conditions for Trading Accounts under AximTrade. Any violation of those trading terms can lead either to the cancellation of the provided deposit or complete disqualification of the trading account. Terms and Conditions can be found on the following page: <https://www.aximtrade.com/term-conditions>
